DARAMOLA JOSEPH OMOYELE

Data & Research Analyst | Economic Analysis & Business Intelligence

Colchester, Essex, UK | info@jomovate.com | Portfolio: daramolajo.co.uk | Business: jomovate.com | LinkedIn: linkedin.com/in/joseph-omoyele-bbb006244/ | GitHub: github.com/dju78 | ORCID: 0009-0006-0347-0499

PROFESSIONAL SUMMARY

Data and Research Analyst with extensive experience turning complex data into clear insights and practical decision-support tools. Combines statistical analysis, economic research, business intelligence, and digital product development to solve operational and policy challenges. Holds an MSc in Economics with Data Analytics (Merit) from the University of Essex. Published researcher with peer-reviewed articles in development economics and institutional analysis, active contributor to UK regulatory consultations, and founder of Jomovate Digital Labs.

CORE TECHNICAL & ANALYTICAL SKILLS

Analysis & Modelling:	Econometric modelling, forecasting, cost-benefit analysis, price-index construction (Jevons, Carli, Dutot), composite indices, Panel ARDL, anomaly detection, scenario analysis
Languages & BI Tools:	R, Python (Streamlit, Pandas, NumPy), SQL, Advanced Excel, Power BI, Tableau, Shiny
Product & Applications:	User & business requirements gathering, interactive dashboards, calculation engines, REST APIs, TypeScript, React, QA testing & validation
Governance & Quality:	GDPR-aligned data handling, reproducible data pipelines, regulatory evidence documentation, tax compliance analytics

PROFESSIONAL EXPERIENCE

Founder & Product Business Analyst — Jomovate Digital Labs (jomovate.com)

July 2024 to Present

Focus: *Founded venture to develop data-driven solutions, conduct applied research, and engineer decision-support tools and analytical dashboards.*

- Gather and document user and business requirements, translating operational and analytical questions into digital products and decision tools.
- Engineered specialized analytical platforms including the UK AI Economic Measurement Lab, Price Quality Explorer, and UKCalc financial platform.
- Perform rigorous testing, data validation, calculation verification, and quality assurance across data pipelines and interactive web dashboards.
- Develop product documentation, methodology guides, and user-centred workflows; explore practical AI integrations for reporting.

Data Analytics | Financial Analyst & Business Intelligence — Univelcity Computing

July 2023 to Present

Focus: *Delivering financial, operational, survey, and research data analysis, predictive modelling, and interactive dashboards.*

- Deliver financial, operational, survey, and research data analysis for development programmes and business research.
- Apply econometric modelling, forecasting, cost-benefit analysis, risk assessments, and scenario analysis across multi-currency environments.
- Design and maintain automated dashboards and decision tools in Power BI, Tableau, Shiny, and Excel, streamlining stakeholder access to timely insights.
- Execute data preparation, ETL, and reporting pipelines using R, Python, SQL, and Excel to uncover trends, risks, and performance gaps.
- Produce clear analytical summaries and policy briefings communicating complex findings to non-technical stakeholders, strengthening GDPR-aligned handling.

Financial Analyst — Nigerian Postal Service

January 2014 to September 2022

Focus: *Financial data evaluation, operational budgeting, revenue/cost variance reporting, and operational efficiency analysis.*

• Analysed nationwide operational, financial, and socioeconomic datasets to support service delivery planning and management reporting.
• Built forecasting models and performance monitoring tools to identify regional efficiency gaps and operational intervention points.
• Designed composite performance indices to benchmark regional facility performance and support objective resource allocation decisions.
• Produced analytical briefings and management summaries translating operational data into actionable service improvement recommendations.
• Strengthened survey design, data collection protocols, reporting standards, and data quality assurance across regional facilities.

Data Analyst/Admin — City College of Education

January 2008 to December 2013

Focus: *Institutional record keeping, student and administrative data verification, academic reporting, and attendance analysis.*

• Maintained assessment records and student reporting databases, strengthening institutional documentation standards and compliance.
• Compiled departmental reports and learning performance data to support evidence-informed learner support and curriculum planning.
• Liaised with academic faculty and management to enhance reporting quality and student progression tracking.

EDUCATION

MSc Economics with Data Analytics (Merit) — University of Essex

2023

Dissertation: Impact of Foreign Direct Investment on Economic Growth in Sub-Saharan Africa (Panel ARDL across 39 countries, 1970–2019, integrating World Bank, IMF, UNCTAD datasets).

BSc Economics — University of Ilorin

2006

SELECTED ANALYTICAL PROJECTS & DIGITAL PRODUCTS

• **UK AI Economic Measurement Lab (ai-measurement.jomovate.com):** Independent research prototype exploring National Accounts classification, Supply & Use tables, and disaggregation of AI economic activity (Python/Streamlit).
• **Price Quality Explorer (pricequality.streamlit.app):** Methodological application demonstrating automated data quality auditing, anomaly detection, and elementary price-index calculation (Jevons, Carli, Dutot).
• **Performance Insight Explorer (performance-insight-explorer.streamlit.app):** Executive decision-support tool transforming operational datasets into KPI benchmarks and trend intelligence.
• **Care Quality Intelligence (cqi.carephrase.com):** Health and social care analytics dashboard delivering quality monitoring, risk oversight, and regulatory audit evidence (React/TypeScript).
• **UKCalc Platform (ukcalc.jomovate.com):** Financial calculation platform translating complex UK statutory tax, mortgage, and income rules into transparent tools.

SELECTED PUBLICATIONS & POLICY CONTRIBUTIONS

• **Journal Article:** Administrative Reach and State Capacity: Interoperability Failures in Nigeria's Digital Identification Infrastructure. International Journal of Development and Economic Sustainability, Vol. 14(1), pp. 33–44 (2026). DOI: 10.37745/ijdes.13/vol14n13344
• **Journal Article:** Dynamics of Foreign Direct Investment and Economic Growth in SADC Countries: A Panel Data Analysis. Journal of Cultural Analysis and Social Change, Vol. 11(2), pp. 222–230 (2026).
• **Regulatory Submission (Ofgem):** Consultation response on open data standards in the energy sector, focusing on data validation, schema stability, and accessibility for smaller users (2024).
• **Regulatory Submission (ICO):** Consultation response on automated decision-making and profiling under UK GDPR Article 22, examining SME impacts and vendor accountability (2024).
• **Practitioner Submission (HMRC):** Practitioner note on Making Tax Digital for Income Tax, introducing behavioural reporting noise and triage safeguards (2024).
